

Exactly What You Want.

Mini Electric™ is a six-inch-wide motorized central vacuum brush, good for vacuuming furniture, stairs, floor mats, vehicle seats, trunks, and anywhere else. It works exceptionally well picking up pet hair, lint, fibers and dirt on sofas, beds, cars, and more. Mini Electric is just two inches tall. Use it under furniture and vehicle seats. Enjoy a cleaner home, garage, RV, or boat with your new Mini Electric.

Mini Electric is compatible with most 2-pin electric hose handles.

Its quiet running motor is governed at 5000 RPM and features belt protecting automatic shutdown if anything gets stuck in the double-chevron brush roll.

Mini Electric maximizes suction and airflow. An electric motor powers the brush allowing airflow to travel straight through, not through an air turbine. Cleaning is efficient.

Removes pet hair off couches in seconds.

Features

- Quiet Electric Motor
- Automatic Shutdown
- 5000 RPM Governor
- Double Chevron Brush Roll
- Cogged Belt
